

# African Savannah

EXPERIENCE

OPENING JUNE 2010

AREA  
8

Go on an exciting African safari adventure... it's totally wild!

## EXTRA-STRIPY ZEBRA!

The zebras at the Zoo are **Grevy Zebras**. Of all the zebras, this type is the largest, the most rare and also the most stripy! The Grevy Zebra lives in small groups in dry grassland regions in Africa.

The savannah regions in Africa are massive areas of dry grassland, where a huge variety of wild animals live. As well as zebras, there are antelope, giraffes, buffalo, elephants and many more.

On the savannah, animals drink in groups around waterholes. Unscramble the letters to find an animal you will see at the Zoo!

E E O P  
T A N L

\_\_\_\_\_

The Grevy Zebra is one of Africa's endangered animals.

## FIND THE FACT

How many different types of zebra are there?

- a. One
- b. Three
- c. Ten

You saw the animals at the African Savannah Experience. Wild!

HAVE A REWARD STICKER!

# My Zoo Quest!

You're an awesome animal adventurer! Fill in this page and hand it to your teacher for display.

Write a poem, review or short story about what you liked best!
